

MIW Baby Scale

Speed, Performance, Value - Perfect Balance

- **Designed for comfort** The MIW's ergonomic cradle with smooth edges throughout ensure maximum comfort for the infant. The scales display hold feature stores the reading so the baby can be removed faster while accurately allowing the weight to be recorded.
- **Smart construction** Strong one-piece construction with metal base for durability. ABS plastic housing for lightweight portability and easy clean up.
- **A better keypad** A positive feel "click" on the keyboard assures users that the desired function has occurred. Buttons are made from durable plastic for easy cleaning and extended life.
- **Convenient to move** Powered by a 9v battery so the unit can easily be moved when desired. Optional carry case keeps the MIW safe in transit.
- **Plus these standard features:** Simple set-up, large LCD display, weighs in both pounds and ounces or kilograms, sealed keypad and tare button.

The MIW 20 is an easy-to-use and extremely portable baby scale. Its smooth edges and ergonomically designed cradle make weighing a comfortable event for both the baby and medical professional. With its smart one-piece construction and metal base the MIW 20 is built to last a long time.
